### Authentic STEM Project

- Mrs. McKinney is excited to share the following:
  - “High school students from Sangre de Cristo, led by science teacher Lauren McKinney and math teacher Chrissy McKinney, are conducting real-world STEM research focused on water sustainability. This is an urgent issue in our region. Students are collaborating with a partner school in Olpe, Germany and working alongside companies with operations in both Colorado and Germany to address authentic challenges related to industrial water use, conservation, and efficiency. Through this hands-on experience, students analyze data, develop solutions, and gain valuable insight into global environmental issues. As part of this international partnership, students and sponsors from Germany will visit the San Luis Valley April 30–May 6. The visitors will be attending school with our students at Sangre and participating in community and state events during their stay. Please help us welcome our guests as we continue to share and learn from each other!”
- The middle school STEM field trip to Dave & Busters and Top Golf will be on May 1st.
